

Unaccounted for Energy Factors

In its April 24, 2009 order, the Public Service Commission directed the Company to supply to ESCOs hourly "unaccounted-for-energy" (UFE) factors for each load zone in Con Edison's service territory and to amend its Retail Access Implementation Plan and Operating Procedure to reflect that requirement. The Company previously supplied average monthly UFE factors for each zone.

Please see the attached spreadsheet for the updated **October 2023 through January 2024 UFE**.

Note: In addition to the **October 2023 through January 2024 UFE** Factors, this newsletter includes the UFE Factors for the **past 24 months**. We have moved the historical UFEs from this Newsletter to a section on our website titled "Related Information". Please be aware that it is possible for the UFE values to change with each billing month, as cancellations and rebillings may occur as settlements are submitted. For the most accurate UFE information, please download the reports directly from RAIS and for more detail on UFE calculations please refer to our Capacity and Energy Reconciliation Guidelines (<https://apps.coned.com/radata/CapacityEnergyReconciliationGuidelines.doc>).
