**5 STEPS TO SAFER DIGGING**

Call 811 Before You Dig

1. Call 811 Before You Dig

2. Wait The Required Time

3. Confirm Utility Response

4. Respect The Marks

5. Dig With Care

Stop digging if you uncover an unmarked line and call 811 immediately.

Digging Safely, a 5-Step Guide to Safer Digging:

1. Call 811 Before You Dig

2. Wait The Required Time

3. Confirm Utility Response

4. Respect The Marks

5. Dig With Care

In case of an emergency call 911 and ConEdison at 1-800-752-6633.
Consider becoming a member of the Gold Shovel Standard Program. It is a combination certification and performance-monitoring program for excavation safety.

GoldShovelStandard.com

CALL 811 BEFORE YOU DIG
Seven days a week, 24 hours a day
This toll-free call will help protect life and property.

New York state law requires excavators to call 811 at least two working days but no more than ten working days. This is a free call and service is available to all. Consider becoming a member of the Gold Shovel Standard Program. It is a combination certification and performance-monitoring program for excavation safety.

For excavation in New York City, call New York City 811 at 1-800-272-4080, or visit www.newyork811.com.

For excavations in Westchester call Dig Safe NY at 811 or 1-800-962-7962, or visit www.DiGSafeNY.com.

Leak Recognition and Response

If you suspect a pipeline leak or rupture, your primary concern should be for your safety and the safety of others.

Avoid all potential ignition sources. Turn off equipment only when it is safe to do so. Avoid the use of cell phones and other electrical equipment.

Leave the area immediately, by foot, in an upwind direction and direct others to do so too.

Once you are a safe distance from the pipeline, call 811 and ConEd 1-800-75-CONED (1-800-752-6633)

Wait for local emergency responders and ConEdison at 1-800-75-CONED (1-800-752-6633) to arrive. Stay a safe distance away from the pipeline. Do not attempt to operate pipeline valves.

Do not try to put out a fire. If it’s burning, let it burn.

Pipeline Marker

The most important part of ConEdison’s gas system is the gas transmission main, which may be identified by the letters TM or TP written on the roadway or by pipeline markers. Please use extra caution when digging around these lines.

The pipeline markers do not designate the exact location, depth or number of pipelines in an area, nor do they designate a straight line between adjacent pipeline markers.

This marks display a warning that natural gas is being transported by ConEdison and the phone number which can be used in case of an emergency or suspicious activity.

• Maps of the transmission pipelines can be obtained from the National Pipeline Mapping System at npms.phmsa.dot.gov.

• NPMs identifies who is operating pipelines in your area along with their contact information. However, it should never be used as a substitute for calling 811 before digging or excavating!

• When you are working around a gas transmission main or Pressure Regulator Station, in most cases, a ConEdison Representative will be monitoring the location after you have made the required one-call notifications.

Visor Card

If in case of an emergency call 911 and ConEdison at 1-800-75-CONED (1-800-752-6633)

IF GAS IS ESCAPING THE PIPELINE

• Alarm all equipment and get a safe distance away.

• Don’t do anything that could create a spark and ignite the gas, such as: starting a motor vehicle, smoking, using electrical equipment or cellphones.

• Call 911 and ConEdison when safety away from the leak.

• Evacuate the area and keep people out until emergency or ConEdison repsondents arrive.

• Do not operate any valves or try to put out any fires.

• Stay upwind.
